🔗 kylrth.com

This is the source for my personal website. I keep the repo public because I think it's valuable to be working in the open whenever possible.

I started this website from the Pickles theme, which I've copied and modified as needed. It's published with an MIT license, which is preserved here. The rest of this repository (including the content) is licensed with CC0, which means you're free to use it how you like.
